

To whom it may concern.

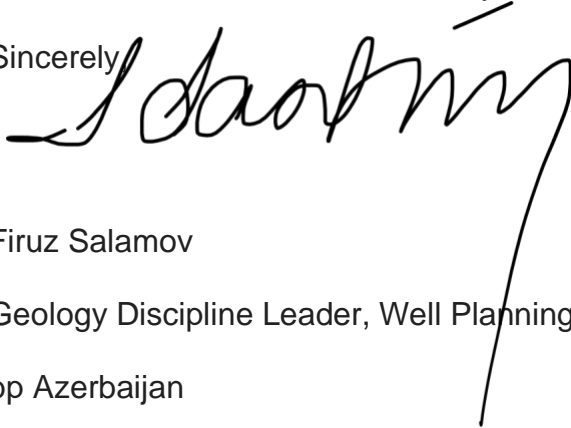

I confirm that Fuad Ildarov, currently student at UFAZ, has completed his internship with bp Azerbaijan in Summer 2024. During his internship he has been working with the multidisciplinary team to deliver the well plan for one of the water injectors in Chirag field.

Fuad was able to deliver the man products and present his work to the team. He has shown great learning capability, team working quality and technical excellence. These are the qualities which the company values much. Fuad's behavior was in line with company code of conduct and he has built solid and healthy relationships with all team members.

I have no reservations to say that Fuad will be a great asset for any team and wishing him best of luck.

This reference letter can be verbally verified if requested.

Sincerely,

A handwritten signature in black ink, appearing to read 'F. Salamov', with a long vertical line extending downwards from the end of the signature.

Firuz Salamov

Geology Discipline Leader, Well Planning and Operations
