Object: Recommendation letter for Fuad Ildarov

Dear Members of the CERN Summer Student Programme Selection Committee,

It is my pleasure to recommend Fuad for the CERN Summer Student Programme 2025.

I know Fuad Ildarov as he enrolled in my course on fluid mechanics in soils at the UFAZ (Franco-Azerbaijani University) at Baku during December 2024.

I can say with confidence that he was one of the best students I have met at UFAZ. Fuad was committed to his study, and demonstrated exceptional understanding and enthusiasm throughout the course, which focused on the behavior of fluids in soil and aquifers, including theoretical principles and practical applications.

Fuad's active participation in class was remarkable. He frequently asked thought-provoking questions, which often led to deeper discussions and enhanced understanding for the entire class. His ability to assimilate challenging concepts and find innovative solutions to tricky problems was remarkable. In addition, Fuad demonstrated great capacity for teamwork, willingly helping his colleagues and fostering a collaborative learning environment. His exceptional performance in the course is reflected in his perfect score of 20/20 on the final exam. Additionally, in the laboratory sessions, Fuad excelled in using COMSOL for fluid dynamics simulations, achieving a near-perfect score of 19/20.

Given Fuad's exceptional academic performance, analytical thinking, and enthusiasm for scientific exploration, I am confident that he will excel at CERN. The skills and dedication he has displayed in his studies align perfectly with the rigorous and innovative environment of your programme.

Yours Sincerely,

Anis Younes
